

EXTRUSION WELDED SEAM TESTING MACHINE

WIL-KEY Vacuum Tester

WIL-KEY VacTest vacuum testing equipment is used for leak check especially on extrusion weld. The inspection box is made from Aluminum cast body for longer lasting and rough uses.

Features:

- Inspection box comes in different sizes and shapes for different applications.
- Using long lasting, minimum maintenance ROBINAR vacuum pump.
- Quick release air valve and large viewing area.
- Complete unit that includes vacuum pump, inspection box, quick release valve, vacuum gauge and flexible hose

WIL-KEY Coupon Cutter

WIL-KEY Coupon Cutter is light weight, robotic and rugged. It precise high carbon tempered steel die made according to ASTM test method and replaceable dies. Able to cut fusion wedge or extrusion welds. Easy and safe to operate and come with custom made carrying case.

Features:

- Light weight, robotic and rugged.
- Precise high carbon tempered steel die made according to ASTM test method.
- Replaceable dies.
- Able to cut fusion wedge or extrusion welds.
- Easy and safe to operate.
- Custom made carrying case

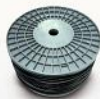

WIL-KEY Portable Tensometer

WIL-KEY Portable Tensometer is for on-site destructive testing (peel & shear) of geomembrane seams (both wedge seam and extrusion seam). WIL-KEY Portable Tensometer is lightweight and runs on a single-phase power supply with digital read-out.

Features:

- Easy to use seam sample clamps.
- Quick reset to zero with a push of a button.
- Variable speed.
- Custom made carrying case.

ACCESSORIES

Welding Rod

Hot Air Blower

Grinder
