

# WIL-KEY WEDGE WELDER

## WIL-KEY Wedge Welder (WK-WD 375.4)

### Specifications

Model	:	WK-WD 357.4
Poewr Supply	:	230V AC
Heater	:	4 x 375 Watts
Welding Width	:	45 mm
Welding Speed	:	max. 3m / minute
Welding Thickness	:	1.00 to 3.00 mm
Overlapping	:	max. 100mm
Net Weight	:	18kg

**Equipment are sent in tailor made carrying case.**

### WIL-KEY Wedge Welder Model

**WK-WD 375** is used for overlapping welding of thermoplastic geomembrane (PVC, HDPE, PP etc) with thickness from 0.5mm to 2.0mm. With a welding maximum speed of 4.0m/min, it is also equipped with an adjustable wedge temprature and adjustable roller control. its swivel head ensure that there is equal pressure exerted on the lower roller creating a double track seam which are equally strong. Portable, lightweight easy to operate and to maintain, the WK-WD 375 is shipped in custom-made casings for easy handling as well.

### Features:

- Digital temperature readout
- Speed, temperature and pressure adjustable
- Wide seams
- Reliable after sales service

## WIL-KEY Wedge Welder (WK-WD 375.3)

### Specifications

Model	:	WK-WD 357.3
Poewr Supply	:	230V AC
Heater	:	3 x 375 Watts
Welding Width	:	45 mm
Welding Speed	:	max. 2m / minute
Welding Thickness	:	0.50 to 3.00 mm
Overlapping	:	max. 100mm
Net Weight	:	12kg
